

As you are now fully aware, addressing COVID-19 is causing organizations to have to work through issues that challenge governance, leadership, and management. Alongside our strategic partners, we remain committed to addressing these needs and assisting our members to effectively communicate, collaborate, and make decisions. To that end, we wanted to share a couple of resources from our partner, eBOARDsolutions, we thought might be helpful.

In response to nationwide school closings resulting from the COVID-19 pandemic, eBOARDsolutions has developed a dedicated website to help school boards better equip themselves to address the challenges of meeting virtually, in an online environment. The website shares best practices on implementing complementary resources to provide school boards with the ability to effectively conduct virtual board meetings. The website also features resources shared from other state school board associations around the country.

Visit [www.virtualmeetings.eboardsolutions.com](http://www.virtualmeetings.eboardsolutions.com) to access the newly developed virtual board meeting guide and online resources.

In conjunction with the virtual meeting guide website release, eBOARDsolutions has also announced **free access to their paperless board meeting software, Simbli**, to eligible school districts. One of six core integrated modules that make up Simbli's board management software, the Meetings module, facilitates paperless board meetings; the software will be available for free for newly subscribing, U.S. school districts until the end of the school year.

Visit [www.eboardsolutions.com](http://www.eboardsolutions.com) to learn more about Simbli or download the [flyer](#) and call or email [Charlie Rigby](#) at [770-822-3626](tel:770-822-3626) to learn more about free access to the Simbli Meetings Module.

Best regards,

Misty Swanson
